APT Intelligence

In-depth Analysis of APAC APT Campaigns and Techniques

APAC has long been the most active battlefield in global cyber conflict. From persistent intrusions into South Korea's energy sector, to attacks on Southeast Asia's financial supply chains, to surveillance of Taiwan's high-tech industry — nation-backed APT groups are behind them.
APT campaigns are marked by persistence, precision targeting, and constant evolution. They adapt tactics quickly, causing not only data leaks and service disruption, but also wider geopolitical and economic impacts. In this environment, continuous monitoring, analysis and prediction of APT activity is vital for defense.

From Indicators to Context

APT activity is not a single event but a chain of actions across time. Fragmented clues cannot show the full picture. Organizations need to connect scattered indicators into context to identify attacker patterns and intent, and act early to stop escalation.
ThreatVision's APT Threat Intelligence integrates TeamT5's long-term APAC research with attacker behaviors, tools, and IoCs, delivering timely and in-depth intelligence that helps organizations anticipate threats and build effective defenses.

Comprehensive APT Coverage

ThreatVision provides 3 types of reports, offering full-spectrum APT insights to support both immediate response and long-term strategy:

APT in Asia Flash Report
(aka Flash Report)

Exclusive TeamT5 research delivering immediate, actionable APT intelligence. Each report dissects a single APT incident with full context and IoCs, enabling rapid deployment of defensive measures.
Published twice weekly, at least 100 reports per year.

APT in Asia Monthly Report
(aka Monthly Report)

Strategic intelligence across the APAC region. Each issue covers 13 - 16 APT incidents with deep analysis of IoCs, malware samples, and infrastructure. Includes trend observations, malware dissection, and technical insights to guide comprehensive defense strategies.
Published once per week, total 12 reports per year.

APT Campaign Tracking Report
(aka CTR)

Longitudinal analysis of specific adversary groups or campaigns. Covers 2 - 3 years of TTPs, tools, and targeting scope, forming the foundation for attribution and long-term defense. Published twice per quarter, totaling 8 reports a year.
At the end of Q2 and Q4, one of the reports will present an APT threat overview of the past 6 months, covering major incidents, affected industries, and common techniques.

Empowering Defense at Every Level

ThreatVision APT Intelligence provides directly usable insights for different teams:

SOC and IR teams

Access latest IoCs and TTPs for faster rule updates and incident containment.

Threat hunters

Use behavioral and technical analysis to detect threats and suspicious activity.

CISOs and strategy leaders

Track adversary tools and tactics to prioritize defenses and allocate resources effectively.

Compliance and risk managers

Integrate threat with geopolitical context to enhance compliance and risk assessments.

Core Values of APT Intelligence

APAC-driven global perspective

Track Chinese, Russian, North Korean & cross-border operations to assess threats.

Time-to-incident correlation

Weekly, monthly & quarterly reports connect incidents to reconstruct adversary campaigns.

Tools ready for deployment

IoCs & rules can be directly integrated into existing systems for rapid response.

Expert-validated intelligence

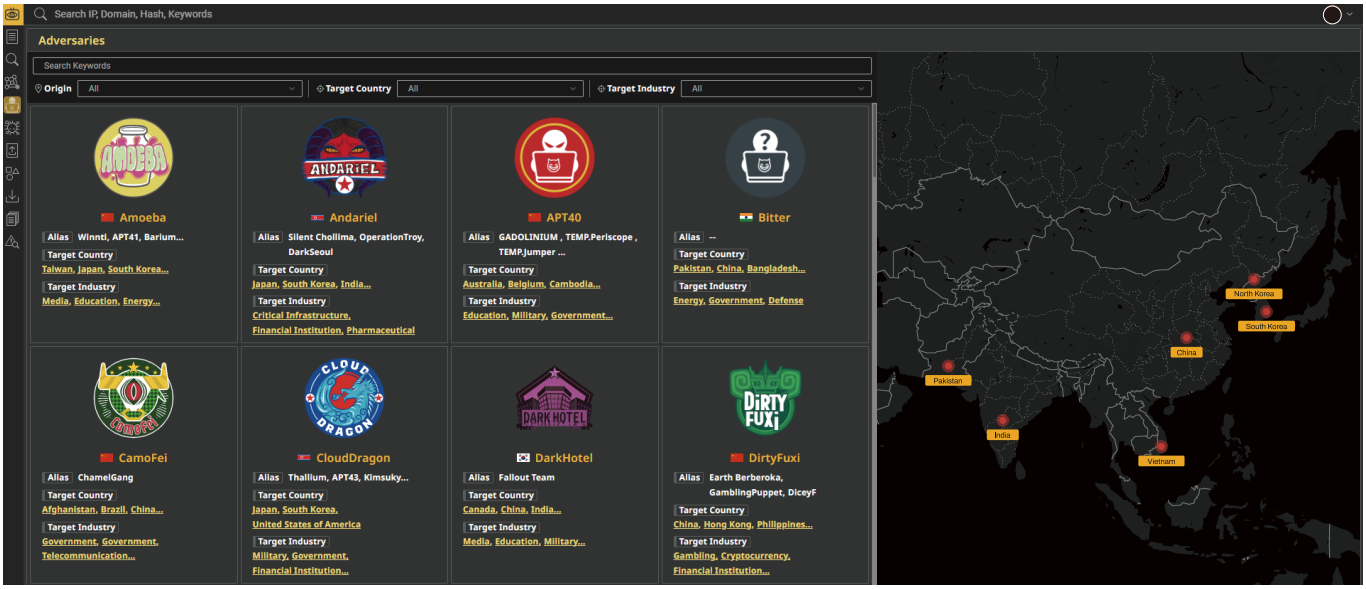
With TeamT5's proprietary telemetry & multi-layer validation for accuracy & reliability.

Staying Ahead of Evolving Threats

APT tactics and techniques keep changing. ThreatVision combines real-time alerts, deep analysis, and actionable tools, enabling organizations to respond quickly and track long-term adversary activity — maintaining resilience and advantage in a complex threat environment.

ThreatVision Platform Overview

ThreatVision's diverse intelligence supports various roles and tasks, helping organizations fully grasp the behavioral patterns of adversaries and proactively deploy defensive strategies. It is the optimal solution from strategic planning to frontline defense.



Get Started with ThreatVision

Please contact the TeamT5 sales team to request a 14-day trial account for ThreatVision. For further information, please email sales@teamt5.org. We look forward to helping protect your organization from cyber threats.

About TeamT5

v.202605

Widely trusted by more than 550 customers around the world, including government departments, technology, manufacturing, finance, medical care, military, telecommunications and other industries.

TeamT5 has more than 20 years of experiences in malware and advanced persistent penetration attacks (APT). With language and cultural advantages, we possess specific expertise in cyber espionage in the Asia-Pacific region, and are often invited to present the latest information at world-class cybersecurity conferences, including Black Hat in the United States, Code Blue / AVTokyo in Japan, Troopers in Germany, and Hack In The Box and FIRST. As a world-leading team in the field of threat intelligence research and advanced cybersecurity technology, we have also been interviewed by Bloomberg and CNN in the United States, Sankei Shimbun and Asahi Shimbun in Japan, and ET News in South Korea.
